

Bogdan Computer Services is looking to add team members.

We are looking for team members that have an interest in implementing and servicing IT networks including copper and fiber, electrical installation, and maintenance, Audio Visual System Installs, Surveillance and Access Control Solutions.

Bogdan Computer Services consults, engineers, installs, and supports different enterprise IT/AV/Security solutions throughout the world that require skilled team members to perform the initial installation, changes, and repairs. The ability to travel is a must due to our large network of clients. We have several opportunities each year that require us to travel to remote areas for work. The technology field is constantly changing so the design and installations are always evolving, which makes it an exciting industry to be in.

Some of the solutions this team member would be implementing are:

- Electrical Changes and/or Additions to support all these solutions.
- Conduit, Innerduct Installation
- Access Control
- Surveillance Systems
- IT Network Infrastructure
- Fiber Optics
- Category Cabling
- Wireless Internet Solutions
- DAS Solutions
- Audio Visual, Video Teleconferencing, Interactive Displays, Projectors, Digital Signage
- Point to Point Satellite Systems
- Public Address Systems
- Duress/Emergency Notification Systems
- Sound Masking Solutions
- Installation of Uninterrupted Power Supply Units

This team member will be provided with a competitive benefit package and financial assistance for continuing education at an electrical trade school and future licensure.

They can see more about us at www.bogdan.net, [Facebook](#), and [LinkedIn](#).

If this opportunity interests, you please send your resume to info@bogdan.net
